PRE-ANESTHETIC FORM

CLIENT NAME/PET _____

SURGERY/TREATMENTS: _____

At South Arlington Animal Clinic, our greatest concern is the well-being of your pet. Before putting your pet under anesthesia, we perform a full physical exam, which is included in your surgery fee. To maximize patient safety, we HIGHLY recommend and sometimes require, a pre-anesthetic blood profile. The simple tests give us a quick look at the complete blood count to assess anemia, infection, and some cancers; organ functions, which include kidney, liver, blood sugar, dehydration, and electrolytes. These results allow for the most appropriate and safest anesthetic regime to be administered.

- I approve the pre-op tests for an additional \$107.50
- I decline the pre-op tests.

Other factors can affect the safety of today's procedure and should be current with your pet.

- All **DOGS** should be on heartworm prevention and have been tested in the last 2 years. If not, a test should be performed before your pet is anesthetized. If negative we will discuss heartworm prevention.
 - I approve the heartworm test for \$64.75
 - I decline the heartworm test.
- All **CATS** should be tested for feline leukemia & FIV/AIDS, especially if your pet is recently adopted, or if the cat goes outside and is not vaccinated for this disease.
 - I approve the leukemia/fiv test for \$115.50.
 - I decline the tests.

Some surgeries require an overnight stay, please note our facility is not staffed during non-operating hours. I consent to knowing that my pet will be unattended during non-operating hours. Please note our building is not equipped with a fire protection sprinkler system.

MICROCHIP IDENTIFICATION SYSTEM COST \$55.00 YES _____ NO _____

We realize surgery and anesthesia are scary for both the family and pet. We strive to make surgery day safe and comfortable for all as there is always a risk with anesthesia and surgery. These tests allow us to minimize surgical risks and maximize patient safety.
